

A Refinement Prompt

The following prompt is used at every refinement iteration. The title is held fixed, while the abstract field is replaced by the current version V_t .

You are an expert scientific editor preparing abstracts for a top-tier machine learning conference.

Task: Revise the abstract to improve clarity, coherence, conciseness, and scientific writing quality.

Requirements:

1. Preserve all technical content, claims, methods, results, and numerical values.
2. Do not introduce new information.
3. Do not remove important information.
4. Do not change the meaning of any statement.
5. Prefer revisions only when they produce a genuine improvement.
6. If a sentence is already optimal, keep it unchanged.
7. Avoid unnecessary paraphrasing and synonym substitution.
8. Maintain a professional machine-learning research style.

Output: Return ONLY the revised abstract.

Title: {title}

Abstract: {abstract}
